VIKING GOOODDS!!!. 10/10 better than Sunset Invasion.. Update!

Changed from not recommended to recommended since the 128k bitrate of the initial release has now been corrected :)

If you have any issues regarding the "feel" of this music in a medieval game, I'd recommend searching for CK2 Viking Metal on youtube and judging for yourself. It did concern me initially, but after a while I look forward to hearing something new.

I would also like to point out that this music pack is not dependant on the game being patched to the most recent version, hence this music works fine in version 2.3.x of CK2.

----- Old review -----

This is one of the better music packs in my opinion, however, unlike all previous music, including the base game music from 2012, this is in a rather feeble 128 kbps variable lossy compressed format. This isn't 1992 Paradox. I'm sure this is a silly mistake, but still, until it is resolved, and the bitrates of the music are back to at least what can be considered "default" for CK2 (192 kbps), I will refrain from recommending this music pack.

I realise I'm being harsh, but there are ringtones for old Nokia phones with higher production values.

I will amend this to recommended once Paradox correct this mistake.. I love the new Music :) thanks for that.. 10/10 best dlc 2016.

All hail our lord Thor for erdicating all frost giants from our world.

...if he's not real, then why don't you see any frost giants?. Great quality music! When can I get more of it?. The music is really freaking good. Not worth the money. Neither Viking nor Metal.

I listened to viking gods for 5 hours while Sips built his city. I had to get it while i built my empire. VIKING GOOODDS!!!. Not relevant to the game.. I was leery at first about buying. I like metal but not a lot of guttural voicals. The tracks are amazing.. Wow. CK2's soundtrack is so epic and immersive, so I didn't expect this pack to be very good - not only is it actually good music, but it actually fits extremely well with the theme of the game, ESPECIALLY playing as a Germanic character.

5V5. Update!

I will amend this to recommended once Paradox correct this mistake.. My wife said Crusader Kings II didn't deserve such epic music.

I had her imprisoned and waited for the Great Blot.
